

RGB1 Twin D Work Positioning Belt

Accredited to: EN 358

Material: 45mm water repellent polyester

Fittings: High tensile alloy steel

Weight: 0.62 kg

Features: 2 x side dees, padded back support

Max Arrest Force: **RESTRAINT ONLY**

The RGB1 is a work positioning/restraint belt, (see the info sheet on restraint vs. fall arrest). This belt is fitted with two side mounted dee rings for ease of attachment and the back pad provides some lumbar support.

The RGB1 is normally used in conjunction with an RGL5 restraint lanyard, or a rope and grab system. Traditionally this item has been used by loading crews at docks, on ships, and container handling areas. However it has more recently been used to access and perform roof maintenance, where the restraint system prevents the user from stepping over an exposed edge and there is no other fall hazard.

It is important that a client understands the difference between fall arrest and restraint before using this item.
